## INTRODUCTION

New Zealand Temporary Structures specialises in mobile hospital and medical facilities intended for use during the Covid 19 crisis.

Thanks to a wealth of experience, and expert project management, NZTS can manage the construction of hospital facilities from design through to its completion.

Talk to us today about how we can provide a tailor-made application adapted to meet your specific requirements.

## ABOUT NZTS

New Zealand Temporary Structures (NZTS) are leaders in the design, supply and installation of temporary and permanent structure systems in New Zealand, Australia and the Pacific.

The modular structures are flexible, safe, comfortable and energy efficient environments, using equipment from world leading manufacturers in modular buildings; HTS tentiQ GmbH.

New Zealand Temporary Structures provides a complete turnkey service using our strategic partners in consultation and planning with local council, building and project management, onsite logistics, temporary power supply and installation, air conditioning co-ordination, furniture and emergency rapid deployment services.

By working in partnership with customers, we identify the best solutions to meet their needs and enhance their business performance.

> **NZTS PROVIDE INTERIM SOLUTIONS for QUARANTINE TENTS and MEDICAL TREATMENT STATIONS**

### Sustainable

Electricity solar, captured by battery power. Sustainable construction practices.

### 100% Renewable

The structure is easily dismantled and can be utilised elsewhere.

# PROUD PARTNERS

HTS | tentiQ

## GLOBAL SPECIALISTS

NZTS proudly partner with HTS tentiQ GmbH – the Clear-Span Structure Specialists.

HTS tentiQ is an award winning company who produces a range of self-supporting, modular clear–span structures, which are available in widths ranging from 3 metres to 60 metres.

HTS tentiQ is one of the leading manufacturers of temporary structures worldwide, with markets in all five continents, and employs a direct workforce of more than 200 people.

## AWARD WINNING

Technology and innovation are the company's key driving forces, with substantial investment in the production processes, playing a major role in the company's steady development.
The company continues to invest in its state-of-the-art, 64,000m² manufacturing facility based in the region of Kefenrod, Germany. This facility enables the company to produce its vast range of high quality products in-house.
This ensures all customers receive optimum service levels, including short manufacturing lead-times, competitive prices and products which are designed and built to the highest quality standards.

## HTS I tentiQ GmbH has sales offices in each of the following countries:

# CLIENT PORTFOLIO

New Zealand Temporary Structures is proud to partner with a variety of different and demanding industries, including events and hospitality, sports and recreation, military and general industry.

By working in partnership with our clients, we identify the best solutions to meet their needs and enhance their business performance.

# KEY BENEFITS OF NZTS

## INNOVATION

New Zealand Temporary Structures is driven by innovation and operates a policy of continuous improvement across the organisation. Regular evaluation of service levels, market trends, pricing and operations enables us to deliver the optimum service and product lines to our customers.

## EXPERT ADVICE

When you contact New Zealand Temporary Structures, you will speak directly to one of our in-house technical sales experts. Their in-depth product knowledge and understanding of your specific needs will ensure that you are provided with a temporary structure that meets your precise requirements.

## OUR COMMITMENT

We thrive on providing a first class product and service resulting in total customer satisfaction. We are always available to answer your general and technical product questions and seek to provide a detailed response within 24 hours of your call.

## COST EFFICIENT SOLUTION

Our modular aluminium framed temporary portable buildings are inexpensive to transport and quick to install by anchoring down to existing level hard standing without needing civil works, making huge cost savings when compared to steel structures or bricks and mortar. To ensure the best results on each job, the NZTS team works closely with all project stakeholders throughout the project from consultancy and design phase through to delivery.

## TURNKEY SERVICE

Providing complete turnkey solutions, we are experts at evaluating and resolving your individual needs and offer a complete service from design stage to completion. With our superior products, fast quotations, on time deliveries and trained installers, we can meet the needs and exceed the expectations of our clients.

## DIVERSE PRODUCT RANGE

We offer a diverse range of temporary structure systems. Our unique 'one frame fits all' system offers a range of cladding systems and ancillary options that easily fit our standard frame sizes. Ensuring bespoke temporary portable and modular building solutions without the premium. Our experienced team will recommend the most suitable system to meet your specific application requirements.

## QUALITY ASSURANCE

We aim to provide our customers with complete confidence in our products. Our range of temporary structures and accessories are manufactured to stringent DIN EN ISO 9001:2008 quality standards, backed by a first rate level of service, providing customers with total peace of mind on products, workmanship and ongoing after-sales support.

## QUICK TO MARKET

With many of our systems stored at our New Zealand warehouse, New Zealand Temporary Structures is in a position to work with our clients to install the temporary solution quickly and efficiently; allowing our clients to quickly capitalise on growth, win new contracts, generate revenue or stay ahead of the competition and avoid hiring off-site.

QMS Quality Management Systems International

Registriertes Zertifikat

Rüder HTS Hücker GmbH

DIN EN ISO 9001 : 2008

The ISO9001 Certificate was awarded for quality systems in the areas of management, design, manufacturing and delivery of products and services.

# NEXT STEPS

## 1. SITE INSPECTION

New Zealand Temporary Structures will arrange a convenient time to visit the site to measure, review access points, power and water supply etc.
Please note the site inspection may incur ancillary costs, including but not limited to, travel. If additional costs apply, NZTS will provide an estimate for approval prior to the inspection. These costs will be removed from the client's invoice should the project proceed.

## 2. FINAL DESIGN AND SCOPE OF WORKS

The design will be finalised following the site inspection, and any input required from consultants engaged to review the site (if required).
Renders will be prepared for the client's review.
Following approval of the final design, the detailed scope of works and final costs will be prepared for review and approval.
Please note, the final design and scope of works stage may incur ancillary costs, including but not limited to, engaging consultants. If additional costs apply, NZTS will provide an estimate for approval. These costs will be removed from the client's invoice should the project proceed.

## 3. PROJECT INITIATION

Following client sign off on the scope and costs, building works will begin.

# CLIENT CONSIDERATIONS

## TERMS & CONDITIONS

- New Zealand Temporary Structures will reserve the right to pass through any costs associated with additional changes by the client after acceptance of quote.
- Coordination of sub-contractors is 10% of invoice cost.
- Full engineering can commence upon receipt of a purchase order.
- Engineer to provide certification and calculations of structure, definitive install estimate calculated and any variations to the quote will be in writing.
- Any event beyond the control of New Zealand Temporary Structures that delays the program of install i.e. shipping, inclement weather or other external factors will not incur further cost to New Zealand Temporary Structures. Any additional costs will be applied by an agreed schedule of rate.
- All install costs are subject to a site inspection to check ground RL's and MHE operational constraints.
- All pricing subject to contract and EBA requirements.

## HIRE PAYMENT TERMS

- Two months hire in advance.
- Installation costs to be paid within 7 days of date invoice. This invoice submission will occur on sign off on the structure installation.
- After the hire period expires, rental can continue if required on a month-by-month basis, with a months' notice required for demob.
- All pricing is in NZ dollars exclusive of all taxes.
